

TECHNICAL INFORMATION SHEET

Product Name **AUTO TRANS TREATMENT 300ML (PART 2)**

PART NO. RATT300

RevEng Auto Trans Treatment is formulated to stop gear shudder and is compatible with mineral and synthetic oils, it softens seals and helps to prevent oil leaks. RevEng Auto Trans Treatment improves shifting of gears and maintain transmission cleanliness. It will improve transmission fluid performance and prevents wear between opposing surfaces. It is highly recommended for trailer and towing vehicles.

RevEng Auto Trans Treatment provides the following benefits:

Improves shifting, increases ATF fluid performance, maintains transmission cleanliness, prevents wear between opposing metal surfaces, maintains seal and gaskets, improves shift valve and solenoid movements and is compatible with mineral and synthetic oils.

DIRECTIONS OF USE

If using a Transmission flush machine, follow manufacturer's instructions. Without the use of a flush machine, drain transmission using RevEng Auto Trans Flush Part 1 (Part no. RATF300). Refill with new fluid and add entire contents of RevEng Auto Trans Treatment, which should remain in the transmission for the entire service interval. Treats up to 10 litres.

SUITABLE APPLICATIONS

RevEng Auto Trans Treatment is suitable for all passenger car transmissions when using a flush machine.
