

TECHNICAL INFORMATION SHEET

Product Name **POWER STEERING TREATMENT 300ML (PART 2)**

PART NO. RPST300

RevEng Power Steering Treatment protects power steering systems from corrosion, wear, rust and oil leaks. It also provides the fluid with additional protection from oxidation. It is formulated to help quieten noisy pumps and to revitalise seals and O-rings. It will improve steering performance, maintain power steering cleanliness, reduces wear and is compatible with most fluids.

RevEng Power Steering Flush provides the following benefits:

Prevents seal leaks, extends power steering fluid life, revitalises seals and O-rings, helps quieten noisy power steering pumps. Improves steering performance and cleanliness. Eliminates shudder when added to new fluid.

DIRECTIONS OF USE

If using a power steering flush machine, refer to the manufacturer's directions.

Without the use of a flush machine the following instructions apply.

Remove 300 ml of fluid from reservoir, add RevEng Power Steering Treatment. Treatment remains in the system until next interval.

For best results empty entire power steering system with the use of RevEng Power Steering Flush (Part no. RPSF300) and then add/mix new fluid with RevEng Power Steering Treatment.

SUITABLE APPLICATIONS

RevEng Power Steering Flush is suitable for Petrol, Diesel, LPG and Hybrid Engines in cars and trucks, and is compatible with most fluids, refer vehicles owner's manual for fluid compatibility.
