

TECHNICAL INFORMATION SHEET

Product Name **SHIELD GUARD 350ML**

PART NO. RSG350

RevEng Shield Guard is an engine lubricant supplement, it is formulated to help reduce friction and wear. It's unique combination of polymers, oxidation inhibitors, anti-wear additives and detergents retards the oxidation and breakdown of the motor oil at high engine operating temperatures. It provides a cushion between worn parts, helping to reduce engine noises and wear. It will reduce oil thickening resulting from oxidation during periods of severe high-speed operation and prolonged engine idle. RevEng Shield Guard helps maintain engine cleanliness to insure proper lubricant flow and mechanical component operation.

RevEng Shield Guard provides the following benefits:

Reduces Friction and Wear, Shields against engine contamination, sludge and corrosion.

Guards Engines at cold start including stop/start engines, protects metal surfaces from coming into direct contact. Adheres, bonds and penetrates metal surfaces, improves fuel economy.

Reduces heat, beneficial to both high and low kilometre engines.

DIRECTIONS OF USE

With the engine turned off, add entire contents to new engine oil. Start/Stop engine before checking oil level.

SUITABLE APPLICATIONS

RevEng Shield Guard is suitable for Petrol, Diesel, LPG and Hybrid Engines in cars and trucks. 1 can is suitable for Sump Capacity of up to 8 litres of oil. FOR BEST RESULTS USE REVENG ENGINE FLUSH PRIOR TO DRAINING OIL.
