

RevEng Engine Flush Technical Data Sheet and Directions For Professional Use Only.

RevEng Engine Flush 350ml – Part no. REF350

ABOUT THIS PRODUCT

RevEng Engine Flush is a pre-oil change engine flush that internally cleans vital engine parts, removing harmful deposits, sludge and varnish that restrict oil flow.

RevEng Engine Flush will gently dissolve and remove internal contaminants without the use of harmful solvents.

RevEng Engine Flush gives added protection to engines with our special formula containing RevEng Shield Guard Protection.

RevEng Engine Flush is a driveable Engine Flush*, allowing mechanics to test drive vehicles prior to oil change.

- * Recommended test drive distance of 10 kilometres maximum.

RevEng Engine Flush Technical Data Sheet and Directions For Professional Use Only.

RevEng Engine Flush Benefits

- Contains effective cleaners that remove sludge, varnish and old contaminated oil deposits.
- Improves oil flow
- Improves Cylinder Compression and power
- Reduces cross contamination with old oil and new oil.
- Provides new oil with a cleaner environment.
- Suitable for Petrol, Diesel, LPG and Hybrid Engines.
- Large 350ml volume can.

Directions of use:

For best results turn engine off, add entire contents to engine and allow to idle at running temperature for 10 minutes.

After 10 minutes, drain sump while oil is still hot, once emptied replace with new oil, check level.

Warning: It is not recommended to use Engine Flush on engines that have more than normal sludge levels or on worn engines, doing so may result in engine damage.
