

TECHNICAL INFORMATION SHEET

Product Name **AUTO TRANS FLUSH 300ML (PART 1)**

PART NO. RATF300

RevEng Auto Trans Flush is a pre-oil change flush that internally cleans vital transmission parts, removing harmful deposits, that impede oil flow. RevEng Auto Trans Flush is specially designed to gently remove internal contaminants by suspending them in a high level of dispersants. RevEng Auto Trans Flush formula provides a high degree of protection to the transmission components and seals, it cleans pumps, valves and hydraulic hoses, it will remove wear metals and improve oil flow, preparing the transmission for new fluid. It is compatible with mineral and synthetic oils.

RevEng Auto Trans Flush provides the following benefits:

Removes varnish deposits, contaminants, sludge and wear metals. Cleans all internal transmission components, improves valve body oil flow and transmission oil pressure. Prepares transmission for new fluid and is compatible with mineral and synthetic oils. Highly recommended for trailer towing vehicles.

DIRECTIONS OF USE

For best results allow the transmission fluid to be at normal engine running temperature. If using an Auto Transmission flush machine, follow manufacturer's directions. Without the use of a flushing machine, add entire contents to transmission, shift through gears several times, drive vehicle if necessary for 5 minutes. After 15 minutes, drain entire transmission including torque converter. Filter must be changed prior to refilling, when refilling add a can of RevEng Auto Trans Treatment Part 2 (Part no. RATT300)

SUITABLE APPLICATIONS

RevEng Auto Trans Flush is suitable for all passenger car transmissions when using a flush machine.
