

TECHNICAL INFORMATION SHEET

Product Name **DIESEL INJECTOR CLEANER 350ML**

PART NO. RDIC350

RevEng Diesel Injector Cleaner is a powerful all-round fuel system cleaner that contains a **Biocide** and a **+8 Cetane Booster**. It provides low sulphur diesel fuel lubricity, cleans injectors and eliminates bacterial and algae growth. The **+8 Cetane Booster** provides increased engine power and better fuel economy. RevEng Diesel Injector Cleaner will improve combustion and provide a much cleaner and more efficient burn, therefore helping to reduce soot entering Diesel Particular Filters (DPF). When added to the petrol tank it will begin working on the impurities already existing in the fuel. It will absorb and emulsify any condensation to allow it to safely pass through the entire fuel system. Detergents will quickly and safely remove any deposits and neutralise harmful acids. RevEng Diesel Injector Cleaner will clean the complete fuel system from the petrol tank through to the combustion chamber.

RevEng Diesel Injector Cleaner provides the following benefits:

- Keeps injectors clean, improves fuel system lubrication.
- Reduces black smoke, guards against corrosion & algae growth.
- Increases power, restores injector spray patterns
- Reduces soot and provides a cleaner burn. Helps to reduce DPF blockages.
- Suitable for all Diesel Engines.

DIRECTIONS OF USE

Add entire can to Fuel tank, treats 80 litres of Diesel. For best results use every 10,000 Kms.

NOT TO BE USED IN PETROL ENGINES.
