

TECHNICAL INFORMATION SHEET

Product Name **DPF CLEANER 350ML**

PART NO. RDPFC350

RevEng DPF Cleaner promotes passive and active regenerations, it allows the DPF to regenerate at 450°C, which helps with city and lower driving speeds. RevEng DPF Cleaner will continue to reduce soot in the DPF before and after the regeneration.

RevEng DPF Cleaner provides the following benefits:

Keeps DPF Filters cleaner for longer, reduces black smoke, improves fuel economy, optimises combustion and decreases soot build up. Reduces the combustion temperature of soot so the particles burn faster and at a lower temperature. Restores engine power, helps to avoid frequent maintenance costs.

DIRECTIONS OF USE

Add entire 350ml can of RevEng DPF Cleaner to fuel tank, use every 15,000 Kms or when required.
