

TECHNICAL INFORMATION SHEET

Product Name **POWER STEERING FLUSH 300ML (PART 1)**

PART NO. RPSF300

RevEng Power Steering Flush is a pre-oil change flush that internally cleans vital power steering parts, removing harmful deposits, that impede oil flow.

RevEng Power Steering Flush is specially designed to gently remove internal contaminants by suspending them in a high level of dispersants.

RevEng Power Steering Flush formula provides a high degree of protection to the steering components and seals, it cleans pumps, valves and hydraulic hoses, it will remove wear metals and improve oil flow, preparing the power steering for new fluid. It is compatible with mineral and synthetic oils.

RevEng Power Steering Flush provides the following benefits:

Cleans Pumps, Valves and Hydraulic Hoses, removes wear metals, improves oil flow, prepares the power steering system for new oil.

DIRECTIONS OF USE

For best results allow the power steering fluid to be at normal engine running temperature.

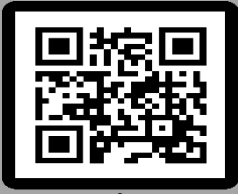

If using a power steering flush machine, follow manufacturer's directions.

Without the use of a flushing machine, remove old fluid from reservoir, top up reservoir with power steering flush. Allow to circulate for 10 minutes. Turn steering full lock several times. Drain entire power steering fluid and refill with recommended power steering fluid.

When refilling, add RevEng Power Steering Treatment Part 2. (Part no. RPST300)

SUITABLE APPLICATIONS

RevEng Power Steering Flush is suitable for Petrol, Diesel, LPG and Hybrid Engines in cars and trucks.
